(54) Title: NATURAL GAS HYDRATE AND METHOD FOR PRODUCING SAME

(57) Abstract: A method for the production of the natural gas hydrate characterised by the steps of: combining natural gas and water to form a natural-gas water system and an agent adapted to reduce the natural gas-water interfacial tension to form a natural-gas water-agent system, allowing the natural gas-water-agent system to reach equilibrium at elevated pressure and ambient temperature and reducing the temperature of the natural gas-water-agent system to initiate the formation of the natural gas hydrate.

2. Citations and explanations (Rule 70.7)

None of the individual citations disclose all the essential features as claimed. Claims 1-43 are novel and involve an inventive step as they characterise a method for the production of the natural gas hydrate by combining natural gas and water to form a natural-gas water system, in that the natural gas-water system is allowed to reach equilibrium at elevated pressure and ambient temperature, and reducing the temperature to initiate the formation of the natural gas hydrate.
